CAREER OBJECTIVE

Computer Science Engineering graduate with hands-on experience in full-stack web development (React, TypeScript, Node.js, Express) and data analytics (SQL, Power BI, Advanced Excel). Skilled in building end-to-end applications with AI-powered features, RESTful APIs, and relational/NoSQL databases. Seeking to apply strong problem-solving and software development skills to deliver impactful, production-ready solutions.

EDUCATION

B.Tech in Computer Science Engineering — Raghu Engineering College, Visakhapatnam

CGPA: 7.75/10 | 2022 - 2026

Diploma in Electronics and Communication Engineering — Sai Ganapathi Polytechnic

Percentage: 76%

SKILLS

Languages & Frameworks: Java, Python, JavaScript, React.js, HTML, CSS, SQL

Databases: PostgreSQL

Data & Analytics: Power BI, Advanced Excel

Cloud & Tools: AWS Fundamentals, Git

EXPERIENCE

Full Stack Development Intern — Codtech IT Solutions

Aug 2025 - Nov 2025

- Developed and maintained backend modules using Java, contributing to core application functionality.
- Collaborated with the development team to design REST APIs and integrate them with front-end components.

AWS AI/ML Virtual Intern — Eduskills / AICTE

Jul 2025 - Oct 2025

- Completed hands-on virtual labs covering AWS cloud fundamentals and AI/ML service integration.
- Gained foundational experience in cloud-based deployment concepts and AI/ML workflows.

PROJECTS

AI SQL Assistant | [GitHub](#) | [Live Demo](#)

- Built a natural language to SQL tool using Groq API (LLM) for schema-aware NL-to-SQL query generation with read-only safety validation.
- Developed frontend with React, Vite, Tailwind, React Router, React Query, and Chart.js for auto-chart selection based on query results.
- Implemented backend with Node.js, Express, Prisma ORM, and PostgreSQL (Neon), with JWT-based authentication.

Expense Tracker Web Application | [GitHub](#) | [Live Demo](#)

- Built a full-stack expense tracking application with React, TypeScript, Vite, Tailwind, and Chart.js for interactive data visualization.
- Developed a secure backend using Node.js, Express (TypeScript), JWT authentication, and bcryptjs password hashing.
- Implemented MongoDB (Mongoose) as the primary data store with a local JSON fallback for offline resilience.

Sales & Business Data Analysis Dashboard

- Built an interactive sales performance dashboard using SQL, Power BI, and Advanced Excel to visualize key business metrics.
- Applied pivot tables and complex formulas to clean and analyze large datasets for actionable business insights.

CERTIFICATIONS

Oracle Certified Foundations Associate — Agentic AI Certified Foundations Associate, Oracle University, Aug 2026

AWS AI/ML Virtual Internship Certification, Eduskills / AICTE, 2025

Full Stack Development Certification, 2025

Data Science Certification, 2025

NPTEL Java Certification | NPTEL Python Certification
