PROFESSIONAL SUMMARY

Computer Science graduate skilled in building full-stack web applications and AI-integrated systems, with practical exposure to cloud fundamentals and data analytics. Experienced designing end-to-end products in React, Node.js, and SQL-based backends — from schema-aware AI features to BI dashboards analyzing over half a million records. Adapts quickly across the stack with a focus on clean, production-ready code.

EDUCATION

B.Tech in Computer Science and Engineering — Raghu Engineering College, Visakhapatnam

2023 – 2026 | CGPA: 7.75 / 10

Diploma in Electronics and Communication Engineering — Sai Ganapathi Polytechnic

2020 – 2023 | 76%

SKILLS

Languages: Java, Python, JavaScript, SQL

Frontend: React.js, Tailwind CSS, HTML, CSS, Chart.js

Backend & Databases: Node.js, Express.js, PostgreSQL, MySQL, MongoDB

Data & BI: Power BI, DAX, Power Query, Advanced Excel

Tools & Platforms: Git, GitHub, AWS Fundamentals, Linux

INTERNSHIPS

Full Stack Development Intern — Codtech IT Solutions Aug 2025 – Nov 2025

- Built and integrated frontend and backend modules for web applications using React and Node.js, following industry development workflows and version control practices with Git.

AWS AI/ML Virtual Intern — Eduskills / AICTE Jul 2025 – Oct 2025

- Gained hands-on exposure to AWS cloud fundamentals and core AI/ML concepts through guided labs, applying cloud-based workflows to practical mini-projects.

PROJECTS

AI SQL Assistant

React (Vite), Tailwind CSS, Node.js, Express, Prisma, PostgreSQL (Neon), Groq API

- Built a full-stack natural-language-to-SQL assistant using schema-aware prompting with the Groq LLM API, letting users query databases in plain English.
- Implemented SQL safety validation to enforce strict read-only execution, preventing destructive queries from ever reaching the database.
- Designed a Node.js/Express/Prisma backend with JWT authentication and a React Query-powered frontend that auto-selects the right Chart.js visualization for each result set.

Expense Tracker

React + TypeScript (Vite, Tailwind, Chart.js), Node.js/Express (TypeScript), MongoDB

- Developed a full-stack expense management app with a TypeScript React frontend and a secure Express/TypeScript backend using JWT and bcryptjs for authentication.
- Modeled data with MongoDB/Mongoose, including a local JSON fallback layer to keep the app usable during database downtime.
- Built interactive Chart.js dashboards for spending trends, giving users a real-time visual breakdown of their finances.

Indian Banking Transaction Analytics Dashboard

Power BI, DAX, Power Query, Excel

- Built a 3-page Power BI dashboard analyzing 5,50,000+ banking transactions (UPI, IMPS, NEFT, RTGS, cards) covering overview, channel/status, and fraud & risk analysis.
- Modeled data using a star schema and custom DAX measures, uncovering that the mobile app channel drove roughly 38% of non-successful transaction value.
- Surfaced fraud patterns showing RTGS carried the highest fraud rate (1.85%) and that 96.7% of flagged fraud customers were one-off occurrences, informing risk-monitoring priorities.

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Certified Foundations Associate — Agentic AI, Oracle University (Aug 2026)
- AWS AI/ML Virtual Internship Certificate, Eduskills / AICTE
- Full Stack Development Certificate | Data Science Certificate | NPTEL: Java, Python
