

DURGA PRASAD CHINTAPALLI

prasadchinthapalli51@gmail.com | [GitHub](#) | [LinkedIn](#)

OBJECTIVE

Full-Stack and Data-driven Software Engineer with hands-on experience building production-style web applications using React, TypeScript, Node.js, and SQL/NoSQL databases, plus practical exposure to AI/LLM integration and cloud fundamentals. Skilled at translating requirements into clean, tested, well-structured code across the stack, with a strong analytical foundation in SQL and Power BI-driven reporting. Seeking a Software Engineer / Full-Stack Developer role to build reliable, scalable products.

EDUCATION

Raghu Engineering College, Visakhapatnam

2026

B.Tech in Computer Science Engineering — CGPA: 7.5/10

Sai Ganapathi Polytechnic

Diploma in Electronics and Communication Engineering — 76%

SKILLS

Languages & Frameworks: Java, Python, JavaScript, TypeScript, React.js, Node.js, Express.js, SQL, HTML, CSS, REST APIs

Databases & ORMs: MongoDB, PostgreSQL, Prisma ORM, Mongoose

AI & Cloud: Groq API (LLM Integration), AWS Fundamentals, JWT Authentication

Data & Analytics: Power BI, Advanced Excel, SQL-based Reporting

Concepts & Tools: OOP, Data Structures & Algorithms, Design Patterns, Multithreading Concepts, TDD Principles, Git, C Programming, Networking Protocols, IoT

EXPERIENCE

Full Stack Development Intern — Codtech IT Solutions

Aug 2025 - Nov 2025

- Developed and maintained backend modules using Java, applying OOP principles and REST API design to support core application functionality.
- Collaborated on debugging, code reviews, and feature integration within a structured development workflow.

AWS AI/ML Virtual Intern — Eduskills / AICTE

Jul 2025 - Oct 2025

- Completed a structured virtual internship covering AWS cloud fundamentals and foundational AI/ML concepts.
- Gained applied exposure to cloud service models and basic machine learning workflows.

PROJECTS

AI SQL Assistant

Natural-language-to-SQL web application that lets users query any connected PostgreSQL database in plain English. Built schema-aware prompting with the Groq LLM API to generate SQL, enforced strict read-only safety validation (blocks all destructive/DDL statements), and added automatic chart selection, query history, and CSV export. Stack: React, Node.js/Express, Prisma, PostgreSQL (Neon), JWT auth.

[GitHub](#) | [Live Demo](#)

Expense Tracker — Full Stack Web Application

Full-stack personal finance tracker with secure JWT authentication, a real-time analytics dashboard, and full CRUD transaction management. Built category-wise spending charts and month-on-month trend visualizations with Chart.js, and implemented a dual-database fallback layer that seamlessly switches between MongoDB and a local JSON store. Stack: React, TypeScript, Node.js/Express, MongoDB (Mongoose), Tailwind CSS.

[GitHub](#) | [Live Demo](#)

Sales & Business Data Analysis Dashboard

Interactive business intelligence dashboard analyzing sales performance using SQL for data extraction/transformation and Power BI for visualization. Built pivot-table-driven Excel reports and dashboards to surface revenue trends and KPIs for business decision-making.

CERTIFICATIONS

- Oracle Certified Foundations Associate — Agentic AI (Oracle University, Aug 2026 - Aug 2028)
- AWS AI/ML Virtual Internship Certification (Eduskills / AICTE)
- Full Stack Development Certification
- Data Science Certification
- NPTEL — Java Programming
- NPTEL — Python Programming
